

**We Track the Buses so You Don't Have To**

# We Track the Buses so you Don't Have To

Introducing the FirstView® District Dashboard and Parent App, the industry's most comprehensive and secure bus tracking and parent communication platform. Easy to use, FirstView® helps districts and parents better manage the moving pieces during the hectic before- and after-school rush.

## Centralize Data

FirstView® centralizes all routes to easily determine each route's status and allows you to quickly review route details.

## Leverage GPS Technology

GPS technology, coupled with the depot's dispatching system, allows dashboard users to see the assigned vehicle's bus location for each route.

## Reduce Incoming Calls

Reduce the number of "where's the bus" calls by encouraging parents to download the FirstView® Parent App. Parents can track their student's bus. They'll also see when the bus arrives to and departs from school.

## Parent Alerts

Message FirstView® Parent App users across the district, a school or route. Parent App users will receive an alert on their app.

## Secure Data

FirstView® integrates with district data security protocols and features password protection and user management.

## Built-In Customer Support

Have a question? The dedicated FirstView® support team is available Monday through Friday via call or email.
