

DistrictView

DistrictView gives you access to your entire transportation system in an easy-to-use web-based portal. The platform helps manage daily communication while gathering accurate, system-wide transportation data for administrative-level decision making.

DistrictView Features

- Districts can easily track the location of all GPS enabled buses on the map
- View student information and user information
- Drill into each run to view the assigned vehicle's GPS information
- Send district and route service alerts to ParentView

NOTE: Many of our systems and tools integrate heavily with data gathered from your District, allowing us to provide accurate reporting and a customized approach. Because these systems rely on unique information about your students and routes, they will not be fully functional on day one. FirstView typically requires one to three months to integrate and sort your data effectively.
