

REVOLUTIONIZING SCHOOL BUS CHARGING INFRASTRUCTURE: INTRODUCING FlexCharge™

The FlexCharge Advantage:

Adaptable Mobility: FlexCharge sets a new standard for adaptability. Its unique design allows for quick removal or relocation, providing school districts with the flexibility to adjust to changing circumstances. No longer bound by the constraints of fixed installations, FlexCharge empowers your fleet to navigate challenges and expand effortlessly.

Construction Cost Savings: Say goodbye to costly digging and trenching. FlexCharge offers a trenchless technology that not only reduces construction costs by at least 30% but also enables rapid deployment, even in cold winter climates. Experience the benefits of a cost-efficient solution without compromising on quality or performance.

Redesign and Relocation Capability: Adapt to changes in charging infrastructure layout or real estate ownership effortlessly. FlexCharge allows you to redesign and relocate infrastructure to meet evolving needs, ensuring your charging system is always aligned with your goals.

Easy Installation and Fabricated Kits: Simplify your installation process with FlexCharge's fabricated kits. Arriving on skids and/or shipping containers, these kits ensure quality and streamline the installation process. Experience the ease and efficiency of setting up a cutting-edge charging infrastructure with FlexCharge.

FlexCharge is more than a product; it's a commitment to innovation, flexibility, and sustainability. As leaders in school bus electrification, we invite you to embrace the future of school bus charging with FlexCharge. Take control of your charging infrastructure, enhance mobility, and reduce costs.

Discover how FlexCharge can transform your school bus fleet and charging infrastructure to meet the demands of the future.
