

FIRSTview

LAUNCH CHEAT SHEET

DistrictView

- Access **DistrictView** dashboard in your **desktop browser** - <https://admin.firstviewapp.com>
- The dashboard is **only** available via your desktop browser and is **not** currently optimized for the mobile browser or via the **ParentView** app
- Your district is subscribed to:
GPS Student ID w/Security Route Level Tracking
- Student IDs are refreshed weekly in the dashboard and can be found in your **Students** tab
- Review/manage your app users and their student's profiles in the **Students** and **Users** tabs
- Invite new users to your dashboard under your profile by selecting **Manage Users**
- Dashboard users can be granted owner/non-owner district-level access and view their school's routes via the **Routes** tab only, school-level invite access is **not** currently an option
- Send route-level service alerts via the **actions gear** in the **Routes** tab next to the route name and review all service alerts sent each week in your **Service Alerts** tab
- Get help by clicking on **Contact Us** or **Help & Info**
- **Training** is available with our Customer Support & Implementation Teams, depending on your district's registration type, via our weekly training schedule
- Marketing/Training materials are available in our **FirstView GPS Toolkit** – https://bit.ly/FirstView_GPS

ParentView

- Download **ParentView** app for free in the **App Store**, **Google Play**, or access via **any web browser** - <https://web.firstviewapp.com>
- The district and local **First Student** partners are responsible for rolling out the app to your **community**
- App users require a **Student ID**, **6-digit FirstView generated security code** and their assigned **route number** to create a student profile
- **Student IDs** and student profiles are **reset** each summer for the next school year, unless your district requests for them to not be reset
- **Route Search** in the app matches the Route Name column in the dashboard's **Routes** tab
- **Configure Notifications** gives app users the option to be alerted when the bus enters their custom **geofence** during a certain **time range**
- Service Alerts sent via FirstView are available in the app under **Notifications**, by adding up-to 3 email addresses in **Notification Recipients**, or by **push notifications** if enabled
- App users can set up tracking for **multiple students** and/or **multiple routes** as needed in the app
- **Banners can be added/removed to the Map per district request by FirstView Support**
- In-app help is available by clicking on the **envelope icon** or **Help**
- Marketing/Training materials are available in our **FirstView GPS Toolkit** – https://bit.ly/FirstView_GPS
